

SEAN JOHN CAMARA

FULL-STACK WEB DEVELOPER

camara.sean13@gmail.com | 09910248649 | github.com/sean-camara | linkedin.com/in/sean-john-camara-ab78a3321 | Philippines

PROFESSIONAL SUMMARY

Computer Science student and full-stack developer building production-oriented web and mobile systems with React, Next.js, TypeScript, Node.js, Express, MongoDB, Firebase, and cloud services. Experienced in role-based business workflows, REST APIs, dashboards, authentication, payments, real-time features, private document handling, AI-assisted tools, deployment, and testing. Also develops native Android applications with Kotlin and Jetpack Compose.

SELECTED PROJECTS

ApplyPH | *Ongoing* | [Repository](#)

- Building a mobile-first job-application assistant for Filipino job seekers using Next.js 16, React 19, TypeScript, a Supabase-ready architecture, and Cloudflare Workers through OpenNext.
- Implemented a guided resume-profile builder, four-path job intake, evidence-linked Match Reports, versioned application packages, private selectable-text resume PDFs, an application tracker/PWA, and Vitest/Playwright test foundations.

RMV Stainless Steel Fabrication System | [Frontend](#) | [Backend](#)

- Developed a multi-role fabrication management platform covering consultation and ocular scheduling, customer and project records, blueprint and costing approvals, staged payments, cash handling, fabrication tracking, and operational reports.
- Built a React 19 and TypeScript frontend with React Query and Zustand plus an Express and Mongoose API using MongoDB, Socket.IO, Firebase authentication, maps, PayMongo, Cloudflare R2, Docker, Nginx, and SSL.

AcademiaZen | [Frontend](#) | [Backend](#)

- Created an installable academic productivity PWA with task management, Pomodoro focus sessions, PDF storage, calendar views, offline support, analytics, push notifications, an AI study assistant, and quiz generation.
- Implemented React, TypeScript, Vite, and Tailwind CSS with an Express and MongoDB backend using Firebase Auth, OpenRouter/DeepSeek, Cloudflare R2, VAPID web push, and PayMongo.

ShelfLife | [Repository](#)

- Built a native Android pantry application for inventory and expiration tracking, shopping lists, receipt OCR, barcode scanning, and AI-generated recipe ideas designed to help reduce food waste.
- Used Kotlin, Jetpack Compose, Room, Firebase Auth, ML Kit OCR, Open Food Facts, and a Cloudflare Worker AI proxy with secret-protected external integrations.

MoneyFlow | [Frontend](#) | [Backend](#)

- Developed a responsive personal-finance application focused on budget tracking, financial goals, clear dashboard workflows, and AI-assisted user support.
- Structured the project as separate frontend and backend applications to support maintainable data flows and future feature expansion.

TECHNICAL SKILLS

Frontend: React 19, Next.js, TypeScript, JavaScript, Vite, Tailwind CSS, HTML5, CSS3, React Query, Zustand

Backend: Node.js, Express.js, REST APIs, Socket.IO, Cloudflare Workers, Firebase

Data & Cloud: MongoDB Atlas, Mongoose, Supabase, Cloudflare R2, Room Database

Mobile & AI: Kotlin, Jetpack Compose, Android Studio, ML Kit OCR, AI API integration, prompt engineering

Tools & Integrations: Git, GitHub, Docker, Nginx, PayMongo, OpenRouter/DeepSeek, Firebase App Distribution

EDUCATION

STI COLLEGE FAIRVIEW | Bachelor of Science in Computer Science | *Expected 2027*

ADDITIONAL STRENGTHS

Full-stack application architecture, authentication and role-based access, database design, responsive UI development, UI/UX implementation, debugging and troubleshooting, performance optimization, version control, testing, and production deployment.
