

Sean John Camara

Full-Stack Web Developer

camara.sean13@gmail.com | 09910248649 | github.com/sean-camara | linkedin.com/in/sean-john-camara-ab78a3321 | Philippines

PROFESSIONAL SUMMARY

Full-stack web developer and software developer focused on building practical, real-world business systems with modern frontend interfaces, REST APIs, database-backed workflows, and cloud deployment. Experienced in creating responsive web applications, authentication flows, dashboards, and integrations that support usable product experiences. Works across frontend, backend, databases, and deployment while applying problem-solving, debugging, and clean implementation practices. Also develops Android applications using Kotlin, Jetpack Compose, Android Studio, Firebase, OCR, and AI-powered features.

TECHNICAL SKILLS

Frontend: React, Vite, Tailwind CSS, HTML5, CSS3, JavaScript, TypeScript

Backend: Node.js, Cloudflare Workers, Firebase, REST APIs

Databases: MongoDB Atlas, Firebase Firestore, Room Database

Mobile (Additional): Kotlin, Jetpack Compose, Android Studio

AI & Integrations: AI API Integration, Prompt Engineering, ML Kit OCR

Tools: Git, GitHub, VS Code, Firebase App Distribution

FEATURED PROJECTS

RMV Stainless Steel Fabrication System

Full-stack business management platform for a stainless steel fabrication workflow, built with modern web development practices. Implemented multi-role authentication, role-based dashboards, customer and project management, and an appointment-to-project workflow. Developed responsive user interfaces, REST API-driven features, payment integration support, MongoDB Atlas data storage, and Cloudflare deployment.

AcademiaZen

Student productivity platform designed for academic task management and focused study workflows. Built features for task organization, AI-powered quiz generation, calendar integration, smart reminders, offline/PWA support, and responsive web access across devices.

FlowMoney

Personal finance management application focused on budget tracking, goal management, and clear financial workflows. Developed a responsive modern UI with structured finance features and AI assistant integration for user support.

ShelfLife

Native Android application for AI-powered pantry management using Kotlin, Jetpack Compose, and Android Studio. Includes receipt OCR, barcode scanning, Firebase integration, and mobile-first inventory workflows.

EDUCATION

STI College Fairview

Bachelor of Science in Computer Science

Expected Graduation: 2027

ADDITIONAL STRENGTHS

Full-stack application architecture, REST API integration, database design, authentication systems, responsive UI development, UI/UX implementation, debugging and troubleshooting, performance optimization, version control using Git, building production-ready software.
